The Japan Society of Applied Physics**

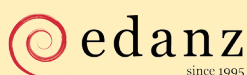

- **Research output in Asia (Tentatively)**
- **Manuscript structure**
- **Making a good first impression**
- **Effective writing**
- **Presenting your research at international conferences**

[Presenter] Koji Yamashita

Koji Yamashita joined Edanz as Chief Executive Officer on 1 January 2016. Koji Yamashita came to Edanz from SpringerNature, where he had been Japan President and Managing Director since 2011, as well as the Regional Sales Director of APAC Springer Healthcare since 2014. Since joining Springer in 2008, Koji has had a strong track record of success, which includes transforming the Japan operation from a traditional regional publishing house to one of Springer's major operating hubs in Asia by divesting the Japanese publishing program and reallocating resources to global publishing and sales activities. Prior to Springer, Koji was the Asia Executive Director of ProQuest, contributing to its establishment and the growth of its businesses in Japan and Asia. Before ProQuest, Koji was a founder and CEO of KnowledgeWire Inc., the major medical and bioscience copyright clearing agency and consultancy house in Japan.

[Presenter] Dr Geraldine Echue

Dr Geraldine Echue graduated from the University of Bristol in 2012 with a PhD in Chemistry. After graduating, she spent several years as a Higher Education Policy Officer for the government of the United Kingdom. Her roles involved leading the auditing process to verify research outputs and enable grant awards for 154 academic institutions in the UK. She was also involved in creating policy research outputs that led to the first national study in England on learning gain in higher education, involving 70 universities and colleges and collaborative research partners in the USA. After this, Geraldine was awarded a 2-year JSPS fellowship to carry out postdoctoral research on new nanomaterials at the National Institute for Materials Science (NIMS) in Tsukuba, Japan. Geraldine has been published in a number of highly regarded international journals including Chemistry -- A European Journal and Langmuir. Geraldine joined Edanz Group in 2018 as a Senior Science Editor and Research Consultant.

About Edanz

Edanz was established in Fukuoka, Japan in 1995 and has helped thousands of researchers all over the world successfully publish in international journals. We offer expert English editing, publication support services, and educational workshops, as well as tools to help authors at every step of the publication process. Edanz has a pool of more than 300 native English-speaking subject matter expert editors. All of our native English experts hold a PhD degree, or equivalent, and are experienced editors. Our in-house team of Senior Editors ensure every manuscript is matched to the right expert to make sure your research is presented clearly and accurately, so you have the highest chance of being accepted.
